Vein Solutions is a Cheshire based private service specialising in modern techniques for the treatment of varicose and thread veins. It is run by Mr Sameh Dimitri who is an experienced consultant vascular surgeon. It offers the latest techniques in treating veins without the need for general anaesthesia.

Vein Solutions offers a walk in, walk out service by using minimally invasive procedures such as endovenous laser therapy (EVLT), foam sclerotherapy and radio frequency ablation of veins (VNUS). Vein Solutions also offers

treatment of thread veins and facial veins with the use of microsclerotherapy and veinwave techniques and fascial vein treatment. All treatments are undertaken under local anaesthetic in about one hour. A small group of patients will still require open surgery for the treatment of their varicose veins under general anaesthesia. More details about treatments and a price list are available from Vein Solutions.

Call free on 0800 0431997 or visit www.veinsolutions.co.uk
